

**3SSC**

**The future system of  
our civilization**

# International Competition of Ideas

Finding ideas for a new model of democracy  
involving AI

# *Global crisis of governance*

Human civilization faces growing systemic risks:

- geopolitical instability
- crisis of democratic institutions
- technological disruption
- global governance fragmentation

Existing political systems are struggling to adapt.

Today's model of functioning democracy is incapable of defeating totalitarian systems.

*The gap between exponential tech progress and outdated socio-political institutions → the risk of collapse of civilization.*

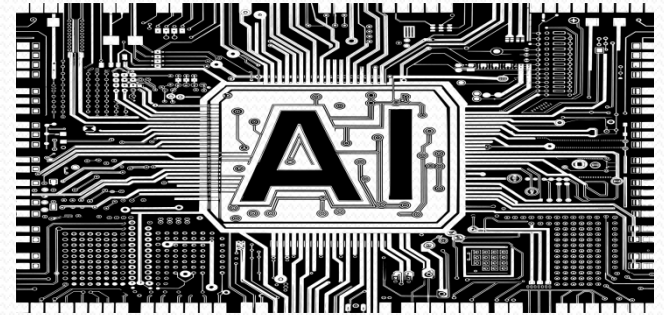

# Our Mission

- Search, generation, theoretical development and implementation of ideas in the field of socio-political innovations for the future of our civilization.
- Search for Ideas capable of consolidating human civilization.
- Creating a bank of ideas to develop an ideology that will form the basis of a new universal model of democracy for all countries.
- Development and implementation of socio-political innovations involving artificial intelligence.
- We will create a high-tech system of capitalization of human reputation, which in turn will ensure the formation of the meritocracy of the future.

# Why new ideas are needed

**Solution: The Competition ideas**

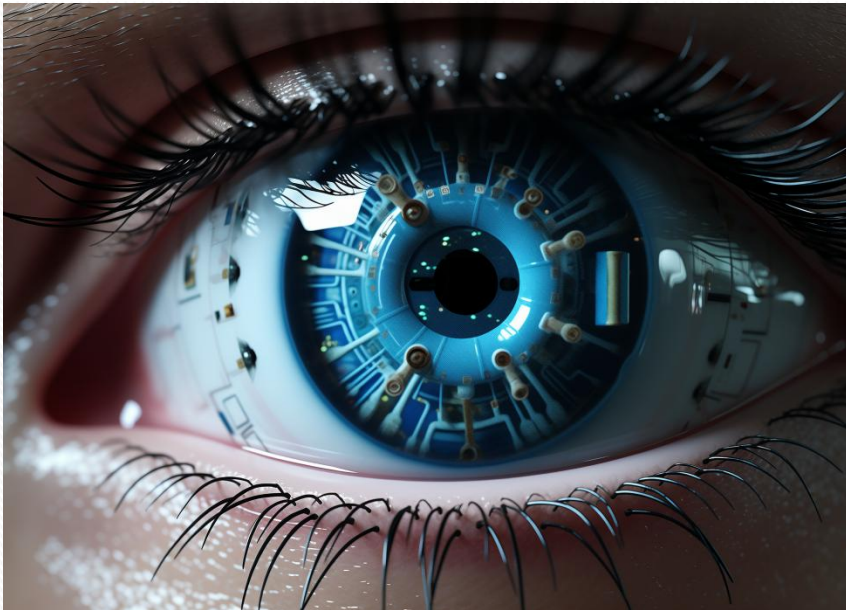

**AI = infrastructure for reputation + governance simulation**

**International open competition + visionary storytelling community + idea implementation system (from theory to pilots).**

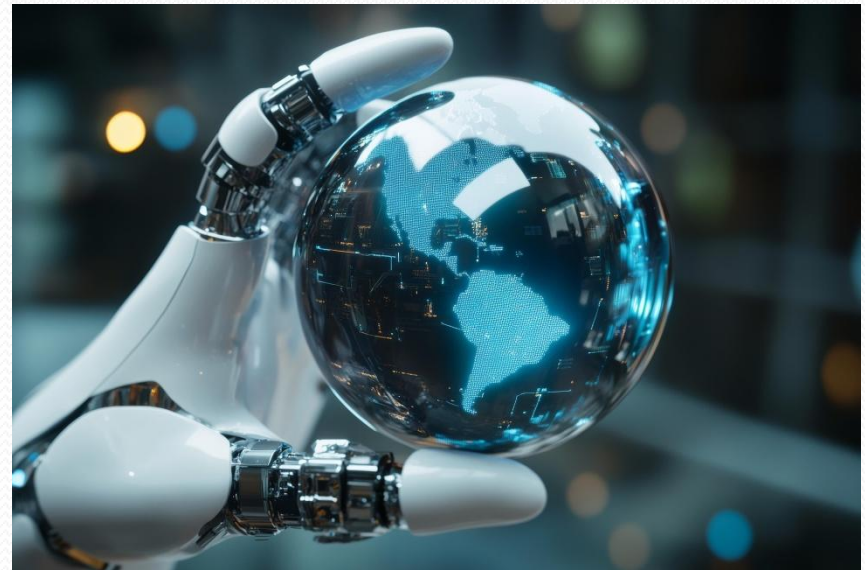

# Innovation & Unique Advantage

- A high-tech system that authoritarian regimes cannot resist. The first model where AI will participate in the process of digitizing human reputation as the main asset of a citizen.
- This project will become an "assembly point" of collective intelligence and a catalyst for global changes in the field of mass consciousness of civilization, the support of its stability, transparency and prosperity.

# Scale of participation. Target Audience

- Scientists, students, Think Tanks, NGOs, tech - companies, all caring people (millions of potential participants).
- This is a public appeal to the intellectual potential of our civilization to organize a joint search and generate breakthrough ideas in the field of socio-political innovations that will allow us to solve the accumulated complex of pathogenic problems of mankind.

# Expected Results

- A new model of democracy with AI
- International Report
- Base of 10,000 + participants
- Community
- Venture Think Tank
- Pilot projects in 5 countries

# Competition Framework

- 30 days filing
- 60 days evaluation
- Criteria: originality, feasibility, ethics
- Prize pool \$100K- \$1M
- IP remains with the authors.

# Path to Implementation

Competition → Selection → Venture Think Tank → Scientific and technological support ideas → Pilotas → Global model launch.

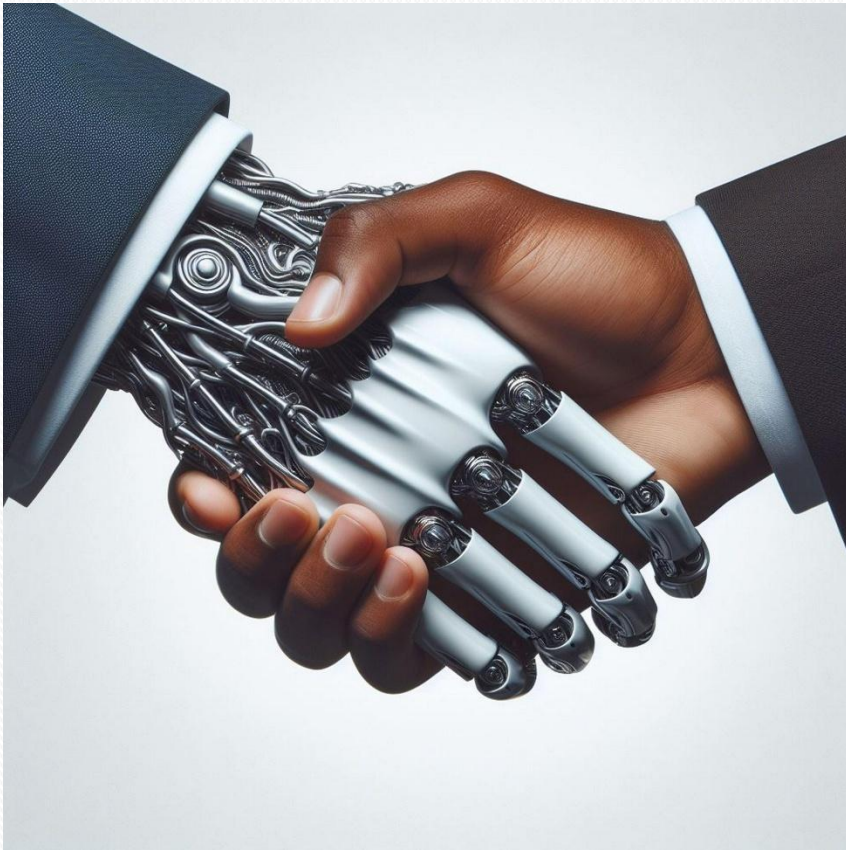

# Why you can pull this off

- movement backed by people of authority
- The intellectual potential of civil society is able to break any problem like an old newspaper
- Give us the opportunity to develop the socio-political technology of the future with the participation of AI

# Why Now?

- 2026-2030 is a critical window: AI is already changing governance, but without a new model of democracy, risks are rising.

# Thank You
